“Woke Ideology and Its Origins in Marxism”

Freedom, liberty, equality before the law, and individual rights are at the heart of the documents that established our constitutional republic. But today, these foundational values of Western democracy are under attack from ideologies that have their origins in Marxism, Socialism, and Communism. This is having profound effects on culture, media, education, politics, and almost every aspect of life—and these changes are happening at an unprecedented pace.

Dr. James A. Lindsay will be addressing these issues in his presentation on Summit University Forum—where the Flame of Freedom speaks. Find out why all this is happening, where it is heading, and what we can do about it.
